Experience

Computer Works Inc Monroe - *Web Developer*

March 2017 - Present

Worked on a small team developing business management tools using PHP, MySQL, SASS, as well as venturing into more modern technologies such as React and Symfony. Interacted with clients on contract, features, and issues to develop client relations and cultivate growth.

Ann Arbor GiveCamp - *CSS, Javascript, Content Migration* - [Website](#)

September 15-17th 2017

Worked with a team of volunteer developers over a weekend to provide the Hemophilia Foundation of Michigan with a Wordpress website to better inform it's community of events and summer camps.

Tech In Monroe - *Meetup Organizer*

February 2017 - Present

Holds meetups for local developers, and those interested in development, to help one another with questions and issues as well as learn about new technology and workflows.

GDI Toledo Presents: *Introduction to HTML / CSS, Toledo, OH* - *Teaching Assistant*

October 22nd & 23rd, 2016

Assisted students in understanding the foundation of HTML and CSS.

Projects

NickKramer.me - *React, Gatsby.js, SASS, HTML* - [Website](#) / [Github](#)

Personal website and blog built with Gatsby.js which is a React based static site generator.

LUMDB - *React, Styled Components, TheMovieDB.org API, CSS HTML* - [Github](#)

A movie database using React to display a list, and individual movie views, of the top 20 current movies using TheMovieDB.org API.

PugCheck - *PHP, Symfony 3, World of Warcraft & WarcraftLogs API's* - [Github](#)

Consuming the Official Warcraft & WarcraftLogs API's to cleanly display a character's raid progression and logs on a per boss and raid instance basis.
